

Chart-Reading Questions

1. Is the "Population Increase" bar bigger or smaller than any single country's bar?
 2. Name one country whose bar is green (an increase).
 3. Name one country whose bar is red (a decrease).
 4. Which country has the tallest green (positive) bar?
 5. Which country has the tallest red (negative) bar?
 6. Is Germany's population change positive or negative?
 7. Is Romania's population change positive or negative?
 8. What color is the final total bar, and how is it different from the other bars?
-

Instructor Answer Key (from the dataset)

1. The total bar (1,074.5) is much **bigger** than any single country's bar.
2. Any of: Belgium, Germany, France, Spain, Sweden, United Kingdom, etc. (19 options).
3. Any of: Bulgaria, Greece, Italy, Croatia, Romania, etc. (9 options).
4. **United Kingdom** (+377.8).
5. **Romania** (-120.8).
6. **Positive** (+328.3).
7. **Negative** (-120.8).
8. It's usually shown in a **neutral/gray color** by default, and unlike the other bars it doesn't "float" between a start and end point — it sits on the baseline, representing the running total of everything before it.
